RedDOT CORPORATION Powersports

POLARIS RZR PRO XP · PRO S

TURBO A/C KIT

The **first-ever A/C kit** for the **Polaris RZR Pro XP and Pro S** — real air conditioning for off-road riding, powered by RedDOT's patented drive system.

30%	104°F	3	60yrs
Up to 30% more cooling than factory-installed systems	Climate wind-tunnel tested with full solar load	Large adjustable vents for targeted cooling	RedDOT experience in heavy-duty mobile HVAC

COOL AIR, WIDE OPEN

The RZR Pro XP and Pro S were never built with air conditioning in mind, and their magneto charging leaves little power to spare. RedDOT's patented, belt-driven drive system solves that, giving the Pro XP and Pro S a dedicated power source for a true A/C compressor. Paired with a roof-mounted two-fan condenser and a ceiling-mounted evaporator with three adjustable vents, the system is designed for off-road riding, delivering targeted airflow and serious comfort without slowing you down.

HOW IT WORKS

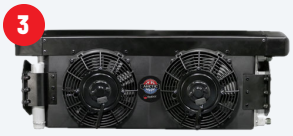
1

DRIVE
Belt-driven power from the engine

2

COMPRESSOR
Pumps refrigerant through the system

3



CONDENSER
Two fans shed heat outside the cab

4

EVAPORATOR
Cold air through 3 adjustable vents

WHY REDDOT

PATENTED DRIVE SYSTEM
Belt-driven U-1001-1P drive built for the Pro XP and Pro S, overcoming magneto limits.

WIND-TUNNEL TESTED
Proven in RedDOT's climate wind tunnel at 104°F with full solar load.

3 ADJUSTABLE VENTS
Three large adjustable vents put cooling where it's needed, with push-button fan and A/C control.

UP TO 30% MORE COOLING
RedDOT rates its A/C kit at up to 30% more cooling than factory-installed systems.

MADE FOR OFF-ROAD
Designed for off-road riding: targeted airflow and serious comfort without slowing you down.

DEALER INSTALLED
Plug-and-play design installed by trained RedDOT dealers for minimal downtime.

WHAT'S IN THE KIT

A/C KIT

REQUIRED

U-1001-1P
Drive System Base Kit — Pro XP / Pro S

U-1002-0P
Compressor — UTV

U-1008-0P
Condenser Assembly — 2-Fan (RZR)

U-1047-0P
Condenser Mounting Kit — Pro XP / Pro S

U-1009-0P
Evaporator — A/C Unit

U-1046-0P
Evaporator Mount Bracket Kit — Headliner

U-1042-0P
Ceiling-Mount Evaporator Harness — 12 ft
2-door & 4-door

U-1043-0P
Ceiling-Mount Evaporator Harness — 4 ft
4-door only (with U-1042-0P)

U-1035-0P
A/C Installation Kit — Polaris

Evaporator harness: 2-door models use the 12 ft harness (U-1042-0P) only. 4-door models use both the 12 ft (U-1042-0P) and 4 ft (U-1043-0P) harnesses.

Requires hoses and fittings for installation. See dealer for recommendation.

ADD-ONS

ADD MORE

HURRICANE ROOF FAN
Forced-air cab cooling

U-1004-0P	Hurricane Rooftop Fan
U-1021-0P	Pigtail Harness — for longer wire runs

VEHICLE FITMENT

Polaris RZR Pro XP
2-Door & 4-Door · 925cc

Polaris RZR Pro S
2-Door & 4-Door · 925cc

Does not fit the Polaris RZR Pro R.

BUILT BY REDDOT

Founded in 1965 and 100% employee-owned since 2000, RedDOT Corporation engineers heavy-duty mobile HVAC and holds more than 25 domestic and international patents. Our systems are available exclusively through carefully selected and trained dealers.
